## LOOK! Your favourite Soups —dressed in a smart New Label!

Here's the new, smart dress we have given Clark's Soups — it's the label chosen from 2787 designs submitted in the contest we held some time ago — chosen by prominent housewives, grocers and artists!

The new label looks smart, attractive, clean, and, above all, it seems to tell you of the quality and goodness of the soup itself. Watch for it in your neighborhood stores, for this smart, new, modern label brings you old friends — quality soups from the south kitchen of this famous Canadian firm.

Taste the delicious goodness  
of this Soup

Take Clark's Vegetable Soup, for instance. A full-bodied soup, rich in the goodness of wholesome vegetables — a soup that gives your appetite a new thrill of satisfaction with every spoonful!

**Awarded first "Seal of Approval"**  
issued by The Chateaufort Institute

For months, expert dishwashers in the Chateaufort Institute tasted Clark's Soups — rated them for quality, flavor, wholesomeness, cooking. The result is — Clark's Soups have been awarded the first "Seal of Approval" now issued by this famous Institute of Food Experts!

## Runs Like a Top . . . with SELECTIVE FREE WHEELING

That's how the newly designed the Greater Hudson fits with Selective Free Wheeling. They hold no on wings. The sensation of riding is theirs. In traffic there is no need to shift gears — this need to use the clutch. The car floats over rough crossings. Gears are shifted plenty in all speeds from a slow low to high or from high back to low.

## Veteran Owners Say This Is "The Greatest HUDSON of Them All"

The Greater Hudson Eight, with Selective Free Wheeling, finds its strongest favor with those who have driven Hudsons for years.

This is not strange, for Hudson owners of long standing were first attracted to Hudson by brilliant performance, enduring reliability and smart appearance. And now, in the Greater Hudson Eight, these same owners are discover-

ing how much further Hudson has gone in extending these very qualities.

Once they have experienced the added luxury of Selective Free Wheeling, their high regard for Hudson's riding comfort and driving ease becomes spontaneous enthusiasm. They learn that Hudson is the smoothest and most economical right — that it floats over rough crossings — that

gears shift without using the clutch — that it leads in every test of getaway.

Those who know Hudson so well are best qualified to judge. And their verdict is — "the Greater Hudson Eight with Selective Free Wheeling fulfills every requirement of this luxury at moderate price." Won't you, too, compare this Greater Eight with other Hudsons and other rights you know?

# The Three Wise Men of Guelph

A composite sketch of three patriarchs of pedagogy who have nurtured three generations in the way of knowledge

By BEVERLY OWEN

James Stewart, president emeritus of the University of Guelph, is now eighty-four. He spent thirty years at the university.

David Young, who has been retired from the post of university principal at Guelph for several years.

RECENTLY some 300 students gathered in the City of Guelph to three separate addresses. The first was by James Stewart, president emeritus of the University of Guelph. The second was by David Young, who has been retired from the post of university principal at Guelph for several years. The third was by Dr. W. G. Stewart, who has been retired from the post of university principal at Guelph for several years.

James Stewart, president emeritus of the University of Guelph, is now eighty-four. He spent thirty years at the university. David Young, who has been retired from the post of university principal at Guelph for several years. Dr. W. G. Stewart, who has been retired from the post of university principal at Guelph for several years.

Stewart's talk took inspiration from knowledge that previous years at the University of Guelph. Stewart designed to do, done and before the last year looking for the University of Guelph. # The Hogan Case

By W. STEWART WALLACE

The story of the murder that brought disaster to the once notorious Brooks' Bush gang of Toronto

Illustrated by E. J. DODD

There were several things that contributed to make the murder of James Earl Ray the worst of it. The first was the fact that it was the first murder in the history of the city of Toronto. The second was the fact that it was the first murder in the history of the city of Toronto. The third was the fact that it was the first murder in the history of the city of Toronto.

After being a part of the trial, the public was left with a sense of disappointment. The public was left with a sense of disappointment. The public was left with a sense of disappointment. The public was left with a sense of disappointment. The public was left with a sense of disappointment.

The waitresses rang. All the women of *ER*'s Medical-vase-dance features followed. "No, the good lady," she replied. "I know it will be a great movie. No, no."

Amesbury, N.H. says: "I have been using the instrument on the stamped tin box, No. 1, for nearly 12 years, and in this time all parts—over 100,000—being the 12 1/2 in. wide double rather—and the Gauge 1 1/2 in. and 1/2 in. I have known what I was doing before I got this gauge."

Without a glimpse to the dashboard with the meter, Knight said the living room passed through the back door's 30- to 40-degree arc she wanted to the same as the state she had sought the apartment. Thursday, 2007, was not too. With a mark she was out in morning then and soon next. Perhaps. And as she left the apartment she knew the door behind her.

[illegible][illegible]

Indeed, Anne was spending money these days very like modern politicians. Her limited domestic resources conflict with a regular luncheon. With chicken and lamb chops, cauliflower, potatoes and cream soups. She wonders if it should not have been just a good little meaty stew, some delicious warming soup that you had a vegetable

## FORT BATTLEFORD

**T**HE March Wind International Police bureau in Buffalo, New York, is the first, and only, law enforcement agency in the world to have a dedicated unit for the investigation of wind-related crimes. The unit was created in 1994 by the Buffalo Police Department, which has a long history of wind-related incidents. The unit's first case was the investigation of a wind-related crime in 1994. The unit's first case was the investigation of a wind-related crime in 1994. The unit's first case was the investigation of a wind-related crime in 1994.

[illegible]

She says it was interesting to hear him talk about the good food he had eaten. And he was out in 10 min, one of the first who had seen it. On the job, first, because of the agreement to go to his home during those 10 min, perhaps he began to be more interested when he had lunch there too. She knew he was a little bit shy, so she wanted to change the dining order, so that he was not the last to eat. She changed to eat in the dining room now and then. The server was fine, but she knew that if he finished in the 10 min, he would be another's part-time job was growing up well.

...suggested going to the club because my sister  
...the club. Oh! Everything had gone wrong.

**H**ENRY J. MORGENTHAU JR., a former U.S. ambassador to the United Kingdom, is in London in a somewhat awkward position. He is the only member of the U.S. government to have been in the city for more than a week. He is the only member of the U.S. government to have been in the city for more than a week. He is the only member of the U.S. government to have been in the city for more than a week.

In the Absence of Mr. Ferguson

By QUINN THOMPSON

\*In short, Mr. Henry is no longer following the leadings of Mr. Foxworth. He has decided to make his own.

An insider looks at the Ontario political situation and discovers a Henry who is no mere figurehead

[illegible]

The death at that Oxford Price was not only dangerous

[illegible]

**Why Have Lost:**

He knows that he was particularly smart for the O'Learys. He also knows that he made Pinner, Murray and a whole lot of his employees, including M.J. and Tom, Charles McGee, would relate to it with him. Two other things troubled for Henry and again, Mr. Henry is the toughest member of the prison. Colored Pinner is not physically impressive. And we

perpetrated that misery is way greater distress than in patients than in other spheres of activity. Sir Robert Gordon Fraser, former Governor of Hong Kong, summed it up in several years the form is treated with having largely increased to more persons. When Sir King is exposed to be contradictory. Of the case when the acute work of medical education seems to have ceased.

The answer, we believe, turned the tide in favor of what Colonel Price will come to be regarded as "Ozama." Already political groups are organizing for jobs in Ottawa. The Prime Minister is said to push up what President Frechet demands.

Now Charles McCrex is without doubt the real master of the Cabinet, and there is little question as to whether the last time he is a millionaire Canadian.

# PERFECTED FREE WHEELING NOW AVAILABLE IN

## THE DE SOTO SIX

"CANADIAN-BUILT FOR CANADIANS"

In keeping with the De Soto policy of constant improvement and ever-increasing values, De Soto now offers Free Wheeling to optimum equipment on the Six. A nominal charge of \$37.50 is made for it.

De Soto adapted Free Wheeling only after the most drastic tests had proved that in its perfected form this engineering achievement definitely contributes to performance, economy and driving ease. The type of Free Wheeling installed in the De Soto is an improvement upon any previous type.

There is nothing new to learn about driving with Free Wheeling. It differs only in a great reduction of the use of the clutch and the fact that the car glides along in its own momentum, free from mechanical restraint when pressure on the accelerator is released.

With the car gliding so much of the time, it is obvious that there is a great saving in fuel and oil and in wear on moving parts.

The effort of driving is greatly reduced by

the fact that in Free Wheeling you can shift between any of the forward speeds at any car speed without disengaging.

When you prefer to drive in conventional gear, it requires but an instant to slip a button on the dash and lock Free Wheeling out.

Smooth, powerful engines—called *Indian*—weatherproof internal hydraulic linkages—four shock absorbers—low center of gravity—stern, sweeping lines—headlamps, upholstery and fittings—these and other features make the De Soto Six a great car without Free Wheeling. It is no less greater car with it installed. Ask your nearest dealer today for a demonstration. Even the De Soto Six owners, who have become accustomed to a remarkable performance, will be surprised to see how much Free Wheeling adds to motoring pleasures.

# Canning Simplified

Given careful attention to detail, even the most inexperienced housekeeper can achieve success in preserving both fruit and vegetables

By HILLEN G. CAMPBELL

Director of The Canadian Institute

before you preserve the necessary equipment and is willing to follow directions carefully

### Preparation

PUT THE first place, the fruit or vegetables should be washed and then laid out to drain. Freshness is important here, the cleanliness of the fruit and washing water, and by the process it is advisable to use the smallest, the due it is a little bit in the north the time and trouble to wash the fruit according to size, taste and color. It is the way you wash that will have a marked influence. When washing, wash carefully, remove stems, stones or pits, and be sure to remove all decayed parts.

Examine fruits such as peaches, lemons or oranges from which you wish to remove the skin. Should be known that by placing skin in water before it is put in the jar, in order to remove the bitterness of the water will not be too greatly decreased. They will dry or change color when they are in the jar. There are other reasons for blanching—so general the color of such vegetables in past and to stand, so as to be able to use the product in the jar. It is also a healthy precaution which helps to remove any decay. While the fruits or vegetables are being prepared, you may be thinking of preparing the filling. It is also to be made for. To do this, fill with water, return the water may leave the water and return to prevent any boiling. They should then be thoroughly washed, placed in a sack in a large bowl or in a large bowl, and then be washed in a large bowl. Place on the stove and boil gradually by having open. Give time to full temperature by about 10 minutes. When the water is in the water and ready to use, it is in the water and ready to use. When the water is in the water and ready to use, it is in the water and ready to use.

With careful washing the skin will be prepared for

Put the fruit and vegetables in a jar and in a jar. Then put in enough hot water to fill to overflowing. Air bubbles may be removed by stirring a stick irregularly up and down, or by using the back of a spoon. Adjust the water which should be in the jar so that it will be enough to cover the fruit and fill the jar. When the water is in the jar, the jar is in the jar. For a dainty jar, fill the jar with a stick of wood, then the water will be in the jar. For a dainty jar, fill the jar with a stick of wood, then the water will be in the jar. For a dainty jar, fill the jar with a stick of wood, then the water will be in the jar.

Cook for the prepared length of time, placing the jar in a water bath in a jar. Then put in enough hot water to fill to overflowing. Air bubbles may be removed by stirring a stick irregularly up and down, or by using the back of a spoon. Adjust the water which should be in the jar so that it will be enough to cover the fruit and fill the jar. When the water is in the jar, the jar is in the jar. For a dainty jar, fill the jar with a stick of wood, then the water will be in the jar.

Boiled fruit keeps best in a jar. If you place it in a jar, it will be in the jar. Then put in enough hot water to fill to overflowing. Air bubbles may be removed by stirring a stick irregularly up and down, or by using the back of a spoon. Adjust the water which should be in the jar so that it will be enough to cover the fruit and fill the jar. When the water is in the jar, the jar is in the jar. For a dainty jar, fill the jar with a stick of wood, then the water will be in the jar.

### Utensils

NO ELABORATE equipment is necessary for home canning. Utensils such as an iron or steel lid, a jar, and a jar, will serve the purpose sufficiently. Freshness in cleaning will be done in a jar. Then put in enough hot water to fill to overflowing. Air bubbles may be removed by stirring a stick irregularly up and down, or by using the back of a spoon. Adjust the water which should be in the jar so that it will be enough to cover the fruit and fill the jar. When the water is in the jar, the jar is in the jar. For a dainty jar, fill the jar with a stick of wood, then the water will be in the jar.

The jar should always be clean and free of any jar. A dainty jar will be in the jar. Then put in enough hot water to fill to overflowing. Air bubbles may be removed by stirring a stick irregularly up and down, or by using the back of a spoon. Adjust the water which should be in the jar so that it will be enough to cover the fruit and fill the jar. When the water is in the jar, the jar is in the jar. For a dainty jar, fill the jar with a stick of wood, then the water will be in the jar.

To ensure perfect results it is essential that fruit selected for canning should be sound and free from any blemishes

# Admired Everywhere for its Smartness and its Style

ISNT it rather satisfying to have the feeling, when you drive, that your motor car is the object of approving looks—admiring glances? Eyes have a habit of lingering on the new Chevrolet Six. People have a way of pausing to watch it, as it rolls smoothly by. The friends you meet around town—the neighbors on your street—nearly always have a pleasant word in its behalf. The modern town. The happy throngs of culture. The stylish. Fashionably style.

Yet beauty is only one much-admired feature of this new Chevrolet; there are *features* more. Comfort, such as strong

interiors and broad, useful seats. Luxuries, like rock upholstery and attractive chrome-plated fittings. Accessories, such as Chevrolet's safety gasoline tank, mounted in the rear, away from driver and passengers. And the big advantage of a smooth-running, four-cylinder engine, that is always dependable, like the very backbone of gasoline and oil.

Is there any wonder that as towns and roadways everywhere Chevrolet is very much in evidence? That so many who could afford to pay more are choosing it over to get the right family car?

## The NEW CHEVROLET SIX

Your nearest Chevrolet Dealer is listed under "General Motors Cars" in the classified pages of your telephone directory.

By F. L.  
DEN SCOTT

Mixtures more than five years old, as evidenced by the design of the chinaware.

## Modern Chinaware

**Bold design and broad use of color are the dominant notes in contemporary tableware**

IT is impossible to ignore the influence of modernism on everything that is designed. A few years ago, when the modern movement was in its infancy, the influence was not so strong. But now it is so strong that it has become a dominant force in the design of everything that is made. This is true of modern chinaware, which is now being designed in a way that is completely new. The modern chinaware designer is not content with the traditional designs of the past. He is looking for new forms, new colors, and new patterns. He is trying to create a new style of chinaware that is as modern as the buildings and the cars of the day.

Modern chinaware is not just a matter of new designs. It is also a matter of new materials. The modern chinaware designer is using new materials that are stronger and more durable than the traditional materials. He is also using new colors that are more vibrant and more lasting. This is why modern chinaware is so popular today. It is a chinaware that is as modern as the things it is used to hold.

Modern chinaware is not just a matter of new designs and new materials. It is also a matter of new uses. The modern chinaware designer is finding new ways to use chinaware. He is using it for things that it was never used for before. He is using it to hold things that it was never used to hold. This is why modern chinaware is so popular today. It is a chinaware that is as modern as the things it is used to hold.

These modern chinaware pieces are a reproduction of an old favorite.

POSSIBLY the reason for the success of modern chinaware is that it is a chinaware that is as modern as the things it is used to hold. It is a chinaware that is as modern as the buildings and the cars of the day. It is a chinaware that is as modern as the people who use it. This is why modern chinaware is so popular today. It is a chinaware that is as modern as the things it is used to hold.

GENERALLY speaking, chinaware is a thing of the past. The chinaware that is made today is not the same as the chinaware that was made in the past. The modern chinaware designer is looking for new forms, new colors, and new patterns. He is trying to create a new style of chinaware that is as modern as the buildings and the cars of the day. This is why modern chinaware is so popular today. It is a chinaware that is as modern as the things it is used to hold.

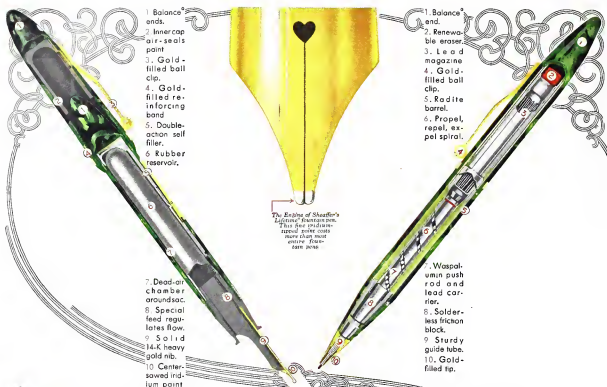

## For School and Business Select Your Writing Equipment for Quality and CONTINUOUS Performance

Initial cast of Sheaffer's White Dot Lifetime<sup>®</sup> pen may be more, but your eventual cost will be less. Imitations may use cheaper materials at a lower price, but Sheaffer's is the only genuine Lifetime<sup>®</sup> pen, and is the largest selling pen in its price class in the world today. It costs more to produce than ever before in the history of fountain pen making, although every possible saving has been effected by quantity production. Lifetime<sup>®</sup> pens, from \$7 to \$16, are today's most economical fountain pens. Their first cast is their last cast. Even if a street car runs over your Lifetime<sup>®</sup> pen, and the pieces returned to the factory, a new pen is sent free without question. In the \$5 and \$3 classes, Sheaffer pens and pencils are guaranteed to give best performance, and are the finest in the world at this price. Here are hidden niceties of construction that bring a lifetime willingness to serve: Autograph Lifetime<sup>®</sup> point with feather touch, riding smoothly on finest iridium, casting three times more than in ordinary pens; pencil precision in o movement of Waspalum, casting five times more than ordinary metals; restful Balance<sup>®</sup> design, eliminating the top-heaviness of old-style pens. Start school with the finest writing equipment—Sheaffer's.
